Omega-6 Fatty Acids* (Min)	2.0%
Omega-3 Fatty Acids* (Min)	0.3%
<i>Bacillus coagulans</i> * (Min)	600 million CFU/lb

*Not recognized as an essential nutrient by the AAFCO Cat Food Nutrient Profiles.

INGREDIENTS: Chicken, chicken meal, cassava root flour, corn protein meal, pea protein, dried egg product, beef fat preserved with mixed-tocopherols, potato protein, dried yeast, pea starch, canola meal, natural flavor, sodium caseinate, fish oil, calcium carbonate, potassium chloride, L-Lysine monohydrochloride, sunflower oil, phosphoric acid, **MINERALS** [zinc sulfate, ferrous sulfate, manganese sulfate, copper sulfate, calcium iodate, sodium selenite], DL-Methionine, salt, taurine, **VITAMINS** [Vitamin E supplement, niacin (Vitamin B-3), Vitamin A supplement, calcium pantothenate (Vitamin B-5), thiamine mononitrate (Vitamin B-1), riboflavin supplement (Vitamin B-2), Vitamin B-12 supplement, pyridoxine hydrochloride (Vitamin B-6), folic acid, Vitamin D-3 supplement, biotin (Vitamin B-7), menadione sodium bisulfite complex (Vitamin K)], choline chloride, dried *Bacillus coagulans* fermentation product.

A463923

Manufactured and Guaranteed by: Nestlé Purina PetCare Company, St. Louis, MO 63164 USA

Animal feeding tests using AAFCO procedures substantiate that Pro Plan Vital Systems Kitten Chicken & Egg Formula provides complete and balanced nutrition for growth of kittens and gestation/lactation of cats.

RECOMMENDED DAILY FEEDING AMOUNTS

Age of Kitten (weeks)	Weight of Kitten (lbs)	Weight of Kitten (kg)	Feeding Amount (cups)	Feeding Amount (grams)
4 - 12	1 - 3	0.5 - 1.4	1/4 to 1/3	35 - 47
12 - 24	3 - 5	1.4 - 2.3	1/3 to 1/2	47 - 70
24 - 36	5 - 7	2.3 - 3.2	1/2	70
36 - 52	5 - 14	2.3 - 6.3	1/2 to 2/3	70 - 93
Over 1 year	5 - 14	2.3 - 6.3	2/3	93

Using a standard 8 oz/250 ml measuring cup which contains approximately 140 g of Pro Plan.

KITTEN FEEDING INSTRUCTIONS

Kittens generally nibble solid foods at 3 - 4 weeks of age. Keep moistened Pro Plan available to these kittens at all times. After weaning, at 6 - 8 weeks of age, kittens will normally eat dry or moistened food at will. If water is added, use no more than one part warm (not hot) liquid to three parts Pro Plan, changing frequently to ensure freshness. As kittens near adulthood, their calorie needs may decrease. Continue to adjust the amount you feed to maintain your kitten in ideal body condition and avoid excess weight gain.

FEEDING FOR REPRODUCTION

Pro Plan provides all the nutrients needed during reproduction. It is not necessary to add supplemental vitamins or minerals. Food consumption can vary during gestation. Feed the amount needed to maintain ideal body condition in the pregnant female. After the kittens are born, feed the nursing female all she wants to eat. Food intake can be 2 - 3 times greater by the fourth week of lactation as it was prior to when the female was bred. Food intake can be increased by feeding Pro Plan moistened with water and feeding twice daily.

MAKING THE SWITCH TO PRO PLAN

Although you'll be anxious to see the difference Pro Plan can make in your kitten, please allow 7 - 10 days to ease the transition from your kitten's current food. Each day, simply feed a little less of the previous food and a little more Pro Plan until you're feeding Pro Plan exclusively. This gradual transition will help avoid dietary upsets.

Contains a source of live (viable) naturally occurring microorganisms.

Provide adequate fresh water in a clean container daily.

For your pet's health, see your veterinarian regularly.
