Recommended daily feeding amounts for puppies with normal activity using a standard 8 oz/250 ml measuring cup which contains approximately 92 g of Purina ONE. Feed as an adult beyond 2 years of age.

PUPPY FEEDING INSTRUCTIONS

Start puppies on moistened Purina ONE as early as they will nibble at solid foods, generally 3 - 4 weeks of age. Allow your puppy to eat at will until fully weaned (6 - 8 weeks). After weaning, Purina ONE can be fed moistened or dry. If water is added, use no more than one part warm (not hot) liquid to four parts Purina ONE, changing frequently to ensure freshness. For best results, develop a regular feeding schedule such as three small meals a day for younger puppies. Gradually reduce to one feeding in the morning and one in the evening as your puppy ages. The routine should not vary. Use the feeding guidelines shown here, but remember individual needs can vary. Feed to maintain ideal body condition.

THE IMPORTANCE OF IDEAL BODY CONDITION

Nestlé Purina Research indicates that avoiding overfeeding of puppies may help their development. Maintaining ideal body condition is key to encouraging proper growth in all puppies, especially large breeds. The indicated amounts are only a guideline. If your puppy becomes overweight, a reduction of his daily food intake may be appropriate. You may wish to consult your veterinarian about a weight control program.

MAKING THE SWITCH TO PURINA ONE

Although you'll be anxious to see the difference Purina ONE can make in your puppy, please allow 7 - 10 days to ease the transition from your puppy's current food. Each day, simply feed a little less of the previous food and a little more Purina ONE until you're feeding Purina ONE exclusively. This gradual transition will help avoid dietary upsets.

NO SUPPLEMENTS NECESSARY

Purina ONE True Instincts With Real Chicken & Duck Puppy Formula provides 100% complete and balanced nutrition for the growth of puppies. There is no need to add vitamins, minerals or other

supplements, unless specifically directed by a veterinarian.

FRESH WATER, PROPER DIET & VETERINARY CARE

Be sure to provide fresh water in a clean container for your puppy daily. Proper diet, exercise and veterinary care are the best ways to keep your puppy healthy. If your puppy hasn't had a checkup in the past year, please make an appointment today.
