Using a standard 8 oz/250 ml measuring cup which contains approximately 101 g of Pro Plan.
We recommend that you keep your dog in ideal body condition and not allow your dog to become overweight. The exact amount of food your dog requires will need to be adjusted according to age, activity and environment. But a good place to start is with these guidelines for an average, active, adult dog fed once daily.

MAKING THE SWITCH TO PRO PLAN
Although you’ll be anxious to see the difference Pro Plan can make in your dog, please allow 7 - 10 days to ease the transition from your dog’s current food. Each day, simply feed a little less of the previous food and a little more Pro Plan until you’re feeding Pro Plan exclusively. This gradual transition will help avoid dietary upsets.

Contains a source of live (viable) naturally occurring microorganisms.

Provide adequate fresh water in a clean container daily.

For your pet’s health, see your veterinarian regularly.

Calorie Content (calculated)(ME):
3417 kcal/kg
346 kcal/cup

Contains 15% less fat than Pro Plan Small Breed Chicken & Rice Formula
